SERVICES AVAILABLE THROUGH TELE THERAPY

The following listing of services can be delivered effectively via the Client's preferred technology device.

Dietetics

- Dietary Management
- Medical Nutrition Therapy
- Personalised Nutrition Plans
- Weight Management
- Dysphagia Management
- Food Intolerances and Allergy Management

USER OPTIONS

There are 3 methods to conduct the TeleTherapy session and are dependent on the Client's ability and resources.

Option 1 – Client has own videoconferencing device and internet connection

Prior to the appointment the Client will be sent an email with a link to join a Microsoft Teams Meeting.

They will be able to join the meeting from any internet enabled smart device as long as they can access their emails.

NB: they may need to a support person to assist with this if unable to do it themselves.

For Option 1 Clients must have a stable internet connection and access to one of the following devices:

- PC and Webcam
- Laptop
- Ipad
- Tablet
- Smartphone

USER OPTIONS

Option 2 – Client utilising an Empower Device

Empower Clinician will arrive at the Client's home as usual, and set up the call across two devices outside the Client's home.

Using gloves, a sanitised device will either be handed to the client or left at the front door for collection.

The clinician will conduct the session away from the home, via the device.

Option 3 – Telephone

Session to be conducted over telephone call if Option 1 and 2 are not feasible

ELIGIBILITY

For all TeleTherapy sessions, Client's will need to meet the below criteria.

If a Client is unable to do any of the below then the TeleTherapy session may require a support person (carer or family member) to attend.

Case Managers are advised to contact our Home Care Team for further advice.

Physical Ability

- Walk around the house without help
- Hold an object with their hands
- In addition, Clients using an Empower Device will need to be able to
 - Pick up ~0.5kg from the floor OR is happy to meet a therapist who is wearing gloves and a mask at the door and have the device handed to them
 - Place a 0.5kg device at an appropriate location
- No vestibular conditions
- No conditions that significantly affect their balance

Vision & Hearing

- Hear their device from at least 1m away
- See their device from at least 1m away

Cognition and Communication

- Understand single step verbal instructions
- Verbally express any concerns
- Focus on the task at hand for a minimum of 20 minutes
